Chaitanya Malineni

Senior Full-Stack Engineer

Dallas, TX • chaitanyamalineni4880@gmail.com • linkedin.com/in/chaitanya-malineni • github.com/CHAITANYAMALINENI • chaitanyamalineni.github.io

SUMMARY

Senior Full-Stack Engineer with 8+ years building React front ends, event-driven backends and cloud-native services at enterprise scale. Architected a multi-region messaging platform serving 300+ microservices (2M+ events/day, 10K RPS peak). Experienced with AWS serverless, observability, and building AI-powered services and agentic workflows.

TECHNICAL SKILLS

Languages	Java, JavaScript, TypeScript, Python, Node.js
Frontend	React, React Router, HTML5, CSS3, reusable component design
Backend	REST APIs, Express, Microservices, Event-Driven Architecture, RabbitMQ, Distributed Systems
Cloud	AWS (Lambda, API Gateway, Step Functions, S3, SQS, CloudWatch, ECS/EC2, CloudFormation), Docker, Kubernetes
Data	PostgreSQL, MySQL, DynamoDB, MongoDB
Observability	Prometheus, Grafana, CloudWatch, CI/CD
AI	OpenAI API, LLM integration, agentic workflows, tool calling

PROFESSIONAL EXPERIENCE

Senior Software Engineer — SS&C Intralinks Jul 2022 – Present

- Architected and own a multi-region, event-driven messaging platform supporting 300+ microservices and mission-critical enterprise workflows.
- Operate highly available backend services processing 2M+ events/day at a peak of 10K RPS.
- Led zero-downtime event schema migrations across 300+ services with full backward compatibility.
- Redesigned retry and dead-letter handling and improved monitoring and alerting, significantly reducing production incidents.

Software Engineer — Idexcel Sep 2020 – Jul 2022

Client platforms: Verizon, Dish Network

- Built React enterprise web applications and backend REST APIs for high-traffic monitoring platforms, with reusable UI components in JavaScript, TypeScript, HTML and CSS.
- Built and ran serverless AWS backends (Lambda, API Gateway, Step Functions, S3, SQS) with CloudWatch logging and monitoring.
- Collaborated across frontend, backend, QA and product teams; improved quality through automated testing and CI/CD pipelines.

Engineering Intern — Axxess Jan 2020 – Mar 2020

Software Engineer — Tata Consultancy Services Sep 2016 – Jul 2018

- Built responsive React enterprise web applications in JavaScript, integrating REST APIs for customer-facing features.
- Reduced API response latency by 40% through backend optimization, efficient query design and caching.

PROJECTS

- **Deep Research AI** — multi-agent pipeline (planner, search, writer, email agents) that researches a question and delivers a long-form report; Python, LLMs, Gradio.
- **Digital Twin** — conversational AI grounded in my LinkedIn profile with context building and tool calls; Python, Gradio.
- **Vehicle Registration System** — React 18 client with Express and MySQL REST backend for vehicle registration and booking flows.

EDUCATION

The University of Texas at Dallas
M.S., Computer Science · 2018 – 2020

VR Siddhartha Engineering College
B.Tech, Computer Science · 2012 – 2016
