Chaitanya Malineni

Senior Software Engineer · Full-Stack

Dallas, TX • chaitanyamalineni4880@gmail.com • linkedin.com/in/chaitanya-malineni • github.com/CHAITANYAMALINENI

SUMMARY

Senior Software Engineer (Full-Stack) with 8+ years building React/TypeScript front ends and Node.js and Java services on AWS. Architected a multi-region, event-driven messaging platform serving 300+ microservices (2M+ events/day, 10K RPS peak). Also building LLM-powered services and agentic workflows. Portfolio: chaitanyamalineni.github.io

TECHNICAL SKILLS

Languages	Java, JavaScript, TypeScript, Python
Frontend	React, React Router, HTML5, CSS3, reusable component design
Backend	Node.js, REST APIs, Express, Microservices, Event-Driven Architecture, RabbitMQ, Distributed Systems
Cloud	AWS (Lambda, API Gateway, Step Functions, S3, SQS, CloudWatch, ECS/EC2, CloudFormation), Docker, Kubernetes
Data	PostgreSQL, MySQL, DynamoDB, MongoDB
Observability	Prometheus, Grafana, CloudWatch, CI/CD
AI	OpenAI API, LLM integration, agentic workflows, tool calling

PROFESSIONAL EXPERIENCE

Senior Software Engineer — SS&C Intralinks

Jul 2022 – Present

- Architected and own a multi-region, event-driven messaging platform supporting 300+ microservices and mission-critical enterprise workflows.
- Run highly available backend services processing 2M+ events/day at a peak of 10K RPS.
- Led zero-downtime event schema migrations across 300+ services with full backward compatibility.
- Redesigned retry and dead-letter handling and improved monitoring and alerting, reducing production incidents.

Software Engineer — Idexcel

Sep 2020 – Jul 2022

Client platforms: Verizon, Dish Network

- Built React enterprise web applications and backend REST APIs for high-traffic monitoring platforms, with reusable UI components in JavaScript, TypeScript, HTML and CSS.
- Built and ran serverless AWS backends (Lambda, API Gateway, Step Functions, S3, SQS) with CloudWatch logging and monitoring.
- Worked across frontend, backend, QA and product teams; improved quality through automated testing and CI/CD pipelines.

Engineering Intern — Axxess

Jan 2020 – Mar 2020

Software Engineer — Tata Consultancy Services

Sep 2016 – Jul 2018

- Built responsive React enterprise web applications in JavaScript, integrating REST APIs for customer-facing features.
- Reduced API response latency by 40% through backend optimization, efficient query design and caching.

PROJECTS

- **Deep Research AI** — multi-agent pipeline (planner, search, writer and notification agents) on the OpenAI Agents SDK that researches a question and produces a long-form report; Python, Pydantic, Gradio.
- **Digital Twin** — chat agent that answers questions about my career from my profile, with tool calling that captures visitor details as push notifications; Python, OpenAI API, Gradio.

EDUCATION

The University of Texas at Dallas
M.S., Computer Science · 2018 – 2020

VR Siddhartha Engineering College
B.Tech, Computer Science · 2012 – 2016
